General Notes about the Poses & Nest Prop

Poses... The poses have HIP section Y Trans set to the default "nesting" height of the nest prop. It is suggested that you used the HIP section for XYZ placement and rotation.

Nest Scaling... Since the Flamingo included in the "Songbird ReMix Flamingo" are different sizes, the nests will need some scaling to fit the flamingo used.

Ground around Nests... This isn't provided but the diffuse and bump texture used for the nests are seamless and can be easily applied to a ground plain.

Nest & Water... Nests in the wild typically are found in water. In Poser/DAZ Studio Nerd 3D's Swamp/Waterfall sets have realistic water. Of course landscapers such as Bryce, Cararra & Vue will do very realistic water.
